

# Valve Division

## Product Data Sheet

### Gate Valves

#### Application

Gate valves are used with:

- Water
- Non-corrosive liquid
- Air
- Saturated steam
- Gas
- Oil

#### Contact Details

Gate valves can be used in commercial, residential and general service applications. The soft seat disc insert made of PTFE has contact with the valve stem in order to prevent any damage to the product such as friction torque. The stem is connected with flashboard through left-hand trapezoidal thread, this is a non-rising stem.

Parameter	Value
Nominal Pressure	1.6 - 2.0 MPa
Working Temperature	-20°C ≤ t ≤ 170°C
Material	Brass, brass flanged, brass magnetic
